

Building & Construction

SLIPGUARD 4222E

Nitto SLIPGUARD 4222E is a surface protection tape, which protects floors and surfaces against staining and abrasion around production areas or during construction work. The unique concept of a special 'Anti-slip' embossed PP carrier combined with a high tack acrylic-based adhesive, reduces the risk from falling or slipping and increases the safety level on construction sites.

Structure

Features

- Anti-slip film
- No need for cleaning solvents
- Easy to apply
- Good abrasion resistance
- Easy to remove after use
- Recyclable

Application

SLIPGUARD 4222E protects all kind of surfaces against dust, foot prints, construction material, paint, water etc. SLIPGUARD is also used to protect work areas (tables), spray cabins, and aircraft wings during repair and maintenance.

Properties

Slipguard 4222E	
Total thickness	210 micron

Warranty

The product is guaranteed to be free from defect in material and workmanship at the time of delivery and will be suitable for use for a period of 6 months thereafter, subject to the conditions set out in our datasheet.

Availability

Widths 1030 mm, 1230 mm (untrimmed log rolls)
Lengths 100 m, 500 m and 1000 m

Please contact us for specific dimensions.

Lamination guidelines

- The tape should be applied on clean and dry surface.
- The composition of the tape makes it suitable for manual application.
- The best lamination conditions are obtained at a temperature between 15 and 40 °C.

Application guidelines

- Depending on the type of substrate and environment conditions, adhesive residue can appear after removing the tape.
- Surface protection tapes are not meant for permanent protection, they should be removed at the end of the supply chain.
- The product does not have antistatic properties.
- For all guidelines we refer to the product datasheet.
