

RAVASOL GAC P4-40

WATER

ACTIVATED CARBON

PURIFYING OUR AIR AND WATER

DESCRIPTION

RAVASOL GAC P4-40, virgin extruded activated carbon produced through a high temperature activation process.

RAVASOL GAC P4-40 can be used in many vapor phase applications with a low-pressure drope during use. It is very effective for removal of organic compounds, deodorization, VOC's, siloxanes, etc.

SPECIFICATIONS

Parameter	Value
Iodine index	> 900 mg/g
Carbon Tetrachloride Activity (CTC)	> 40%
Moisture (as packed)	< 5%
Nominal Diameter	4 mm
Hardness number (ball-pan)	> 90%
Ash content	< 12%
Apparent Density	570 ± 30 Kg/m ³
