

**RAVASOL GAC P4-60**

**WATER**

**ACTIVATED CARBON**

**PURIFYING OUR AIR AND WATER**

**DESCRIPTION**

RAVASOL GAC P4-60, virgin extruded activated carbon produced through a high temperature activation process.

RAVASOL GAC P4-60 can be used in many vapor phase applications with a low-pressure flow during use. It is very effective for removal of organic compounds, deodorization, VOC's, siloxanes, etc.

**SPECIFICATIONS**

Parameter	Value
Iodine index	> 900 mg/g
Carbon Tetrachloride Activity (CTC)	> 60%
Moisture (as packed)	< 5%
Nominal Diameter	4 mm
Hardness number (ball-pan)	> 90%
Ash content	< 12%
Apparent Density	570 ± 30 Kg/m <sup>3</sup>
