

RAVASOL GAC P4 KOH

WATER

ACTIVATED CARBON

PURIFYING OUR AIR AND WATER

DESCRIPTION

RAVASOL GAC P4 KOH, virgin extruded activated carbon produced through a high temperature activation process and chemically impregnated with KOH.

RAVASOL GAC P4 KOH can be used in many vapor phase applications with a low pressure drop during use. It's very effective for removal of H₂S, mercaptants, HCl.

SPECIFICATIONS

Parameter	Value
Iodine index	> 750 mg/g
Carbon Tetrachloride Activity (CTC)	> 50 %
Moisture (as packed)	< 5 %
Nominal Diameter	4 mm
Hardness number (ball-pan)	> 90 %
Ash content	< 12 %
Apparent Density	570 ± 30 kg/m ³
KOH	> 6 %
