

RAVASOL PAC FG-500

WATER

ACTIVATED CARBON

PURIFYING OUR AIR AND WATER

**DESCRIPTION**

RAVASOL PAC FG-500 is a virgin powdered activated coke produced from bituminous coal through a thermal activation process.

RAVASOL PAC FG-500 is recommended to ensure high performance treatment in flue gas applications, in particular to capture dioxane and furan emissions from municipal waste incinerators.

SPECIFICATIONS

Parameter	Value
Iodine index	>500 mg/g
BET	>500 m ² /g
Moisture (as packed)	<5%
Ash content	<12%
Apparent density	570 ± 30 Kg/m ³
Sulphur content	< 0.5%
